Profile

Hi, I am **Dincher Selimov**, a dynamic professional embodying patience, responsibility, and adaptability. As a strong communicator and versatile team player, I bring a positive attitude to every task. My commitment to continuous learning, trustworthiness, and reliability make me a valuable asset to any team.

Education

Bachelor's degree, *"N. Y. Vaptsarov" Naval Academy"* "Information and Communication Technologies"   Varna, Bulgaria

Master's Degree, *"N. Y. Vaptsarov" Naval Academy"* "Cybersecurity"   Varna, Bulgaria

Professional Experience

Web Developer, *Tradants GmbH*   2022 Oct – 2023 Sep
In my role at Tradants GmbH, I excel in WordPress development, GCP, and   Varna, Bulgaria
AWS, managing PHP code, testing, security, and production deployment. I
ensure code robustness, conduct thorough testing, and implement stringent
security measures. Proficient in both GCP and AWS, I streamline deployment
processes, contributing to the company's success through continuous learning
and innovative solutions.

Software Developer and DevOps Engineer, *MANIK-IT*   2021 Mar – 2022 Aug
                                    Varna, Bulgaria

PHP Developer(Magento), *InitOS GmbH*   Magdeburg, Germany
During my 2-month tenure at InitOS GmbH, I excelled as a PHP (Magento)
developer, proficiently crafting and maintaining high-quality PHP code. My
responsibilities included adeptly navigating version control systems and
ensuring seamless code management.

Languages

Bulgarian
Native speaker

Turkish
Native speaker

English
Good writing and communication skills in English

Projects

DCAT-AP
Test case specification and development for DCAT-AP for a German partner (Bable GmbH). Testbed development for IoT Protocols based on FI-WARE

Magento Developer
I possess expertise in Magento, having focused on crafting and maintaining PHP code. My role involved optimizing code for seamless operations on the Magento e-commerce platform, showcasing my proficiency in creating efficient and scalable solutions.

WordPress Newsletter Integration and Trading Platform Development
Successfully designed, developed, and maintained a trading website using WordPress. This project showcased my ability to create user-friendly and visually appealing front-end interfaces. Proficiently processed and maintained user data within the trading platform, ensuring data integrity, security, and accessibility.

Skills

PHP
Good understanding of OOP Principles and MVC. Beginner/intermediate level with Symfony

Java
A year programming experience with Java. Working with OOP principles and writing clean reusable code.

Version Control
Experienced with Version Control for over 2 years, skilled in Jira and BitBucket. Proficient in daily Linux commands. Ready to contribute effectively to coding projects and streamline processes.

WordPress
Significant experience with WordPress. Good experience with plugins, responsive design and shortcodes.
